State of the Internal Display

- 1. [---] --- Reticule (aiming system)
2. [0.0] --- Distance/measurement status display
3. [] --- Indicates distance being measured in meters.
4. [YD] --- Indicates distance being measured in yards.

Operational Summary

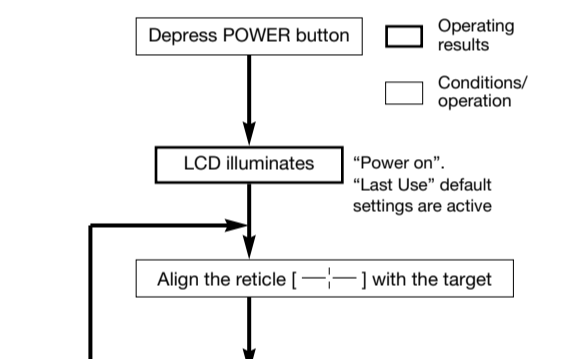

Caution—use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure

- 1. Install a battery in the battery chamber.
2. Dioptr adjustment
3. Measuring

Composition

- Body x1
Neckstrap x1
Lithium battery (CR2) x1

Nomenclature

Water resistant models

In normal use, there will be no water penetration.

Operational Summary

Caution—use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure

- 1. Install a battery in the battery chamber.
2. Dioptr adjustment
3. Measuring

Composition

Neckstrap x1
Lithium battery (CR2) x1

Nomenclature

Changing Batteries

- Type of battery: 3V CR2 Lithium battery

Battery condition indicators

- Battery has enough charge for use.
• Battery charge is getting low.
• Battery charge is low and battery should be recharged.
• Battery is exhausted and should be replaced.

Open the battery chamber cover

Insert a coin or similar implement into the slot in the battery chamber cover, and rotate it following the "Open/Close" indication.

Close the battery chamber cover

Screw the cover back in place using a coin or similar. The Laser 440 will not operate if the battery is installed incorrectly.

Battery life

Continuous operation: Approx. 6,000 times (at 20°C)

Specifications

The Nikon Laser 440 features a Roof-Prism monocular optical system for viewing targets.

Optical system

Type: Roof-prism monocular
Magnification: 8x
Effective diameter of objective lens (mm): ø20mm

Operational Summary

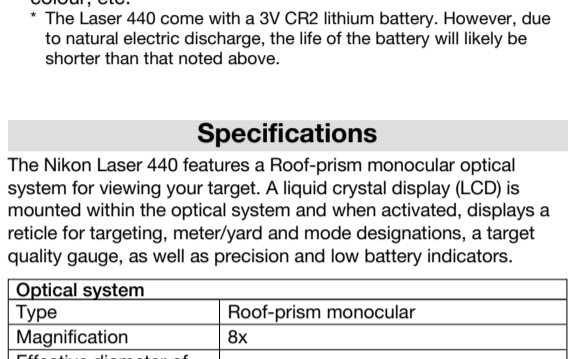

Caution—use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure

- 1. Install a battery in the battery chamber.
2. Dioptr adjustment
3. Measuring

Composition

- Body x1
Neckstrap x1

Troubleshooting/Repair

If your Nikon Laser 440 should require repair, please contact your local dealer for details regarding where to send it. Before doing so, you are advised to consult the Troubleshooting Table below.

Symptom Check Points

- Does not turn on or LCD fails to illuminate
• Depress POWER button.
• Check and replace batteries if necessary.

Target range cannot be obtained

- Be sure that nothing, such as your hand or finger, is blocking the laser emission aperture and laser detector.
• Be sure that the laser emission aperture and laser detector are clean. Clean them if necessary.
• Be sure that the target shape and condition is appropriate to reflect the laser beam.
• Replace battery.

Close the battery chamber cover

Screw the cover back in place using a coin or similar. The Laser 440 will not operate if the battery is installed incorrectly.
